Mike,

Thank you for providing the number of employees at DSWA (112).

Please see attached Delaware State Plan documents. In the DE Plan there is a table on page 8 that is missing some information. If you can provide the Design capacity for each landfill that would be helpful. There is also a column for the Estimated NMOC Emissions (Uncontrolled). I have the numbers for 2015 from the emission inventory submissions. If you can provide the 2016 numbers when you have it, that will be great. We will need the numbers prior to the public hearing (which is a few days before the emission inventory will be due).

2015 NMOC uncontrolled emissions (from LandGEM) are 47.15 MG/yr at CIL; 28.85 MG/yr at CSWMC; and 12.83 MG/yr (all generated using site specific inputs to LandGEM).

The date of the public hearing will be on April 24th at 6 pm in the auditorium of the R&R building in Dover. It will be advertised on March 19th.

Any questions please let me know.
See you on Thursday,

Angela

Subject: Drafts of the 1120-30 and the State Plan are ready for review

Hi Angela,

I have attached the following files, which are ready for initial review and comments from DSWA.

1. Ron's Delaware MSW Landfill Plan,
2. The draft version for adoption of Section 30 in Reg. 1120, and
3. The technical support document that indicated the changes to Sub XXX as shown in item 2 above.

If you could send these on to your contact so that can identify in possible areas of concern, I would be grateful.

One other thing, could as request a written comment (email would do) that DSWA has 1) ~XX employees or 2) more than 50 employees? This information is needed confirm that we are exempt from the Regulatory Flexibility Act requirements. I found the DSWA revenues in their 2015 Annual Report that indicates their revenues exceed \$10 million, which the other area associated with the exemption.

Thank and please let me know of anything else I do to help you on this.

Jim
